

IN THE SPECIFICATION

Please replace the following paragraphs of the specification. Applicant includes herewith an Attachment for Specification Amendments showing a marked up version of each replacement paragraph.

Please replace the paragraph beginning on Page 13, line 22 with the following new paragraph:

01 Figure 10 schematically illustrates the provision of a laterally adjustable moveable fence portion on each lateral side of an exemplary compound miter saw according to the invention. The structure which allows for this movement on each lateral side of the compound miter saw is the same as the structure which permits movement to one side only as illustrated in Figures 1-4 and 6, except that permanent stops which position saw blade 14 at its vertical position have been eliminated. These structures which permit movement on each lateral side of a compound miter saw are well known in the art. Such dual moveable fence provision accommodates movement to selective miter, bevel, and compound cutting operations on either lateral side of the compound miter saw. Similarly, such an arrangement is advantageous in other work-performing devices where work operations can be (preformed) on either lateral side of the device, as well as being capable of accommodating large working tools, such as large shaper cutters, for example. ← *

IN THE CLAIMS

Please add new Claims 27-29 as follows.
